

i'm just a guy from jersey and all i know is time changes and things must improve for all of us and if people can't share the wealth than this is a crazy crazy world. why shouldn't satelite radio have traffic and weather, i listen to it and regular radio. i believe share is the key word here and if the people who are losing money cause people want satelllite than isn't that your answer. people make the choices and we choose how it is. greed is not the answer for wasting tax payers money. thank you Doug P Rozum Jr
